

MID TERM ASSESSMENTS

Open Ended Lab	
Blooms Taxonomy	GAs
C3	GA-
A	2
2	GA-
	6

Dataset A

Hazing Images Dataset (Dense-Haze CVPR 2019)

<https://www.kaggle.com/datasets/rajat95gupta/hazing-images-dataset-cvpr-2019>

Dataset B

 <https://www.kaggle.com/datasets/rajneesh231/salt-and-pepper-noise-images>

Implement the following:

Problem Statement:

You are given **2 small datasets** containing blurred, noisy, or low-quality images. Your task is to perform **image filtering** and following the restrictions below:

Q1. Filtering Requirement

- Choose **ONE best-fit filter per dataset** (either low-pass OR high-pass).
- Apply **only TWO filtering techniques total** across all datasets.
- Apply pyramids techniques according to dataset

Students must justify:

- a) Why the selected filter is suitable.
- b) Why other filters were not selected
- c) Which pyramid selected and why?
- d)

CLO Category	CLO domain	Marks	Obtained marks
CLO 1(10marks)	Apply Computer Vision Concepts. Solving Real-World Problems	10	
CLO 2(6marks)	Participate in implementing advanced Computer Vision tasks.	5	
Total		15
